Re: Price Increase

Valued Precision Plumbing Products Customers,

Due to the summer's increases in raw material, continued factors in transportation and labor costs, Precision Plumbing Products will be implementing the following price increases effective December 6, 2021. All orders placed on or before December 3, 2021, will be honored at current pricing.

This increase will include all SKUs and will be approximately 5%

Please visit PPP's website: [www.PPPinc.net](http://www.PPPinc.net) in the near future to download an updated price guide. As always, feel free to contact me with any questions or concerns.
