Re: Price Increase

Valued Precision Plumbing Products Customers,

Due to continued increases in raw material, factors in transportation and labor costs, Precision Plumbing Products will be implementing the following price increases effective August 1, 2022. All orders placed on or before July 31st, 2022, will be honored at current pricing.

This increase will include all SKUs and will be approximately 5-6% on most items.

Please visit PPP's website: www.PPPinc.net in the near future to download an updated price guide. As always, feel free to contact me with any questions or concerns.
