FIRE RATED LAUNDRY AND ICEMAKER BOX SUBMITTAL

www.pppinc.net

Precision Plumbing Products has designed a fire rated Laundry and Ice maker box assembly that makes your installation simple and cost effective. Solenoid operated equipment can create destructive water hammer due to quick closing valves on the fill cycle. Water hammer can damage or even break your hose connections as well as destroy the solenoid valve. To avoid this common household problem hook your washing machine hose connectors to the quarter turn ball valve in our laundry box assembly with water hammer arrestors and rest easy. Boxes are 1 and 2 hour fire rated and include a 1/4" thick intumescent pad for fire protection.
