OFF TIME:

8 and 16 to the right all others to the left

Run Time

Run time is given in minutes. Therefore 0.1 switch represents one tenth of a minute, or 6 seconds. The 0.2 switch represents two tenths of a minute, or 12 seconds. The 6.4 switch represents 6 minutes and 24 seconds (.4 times 6 seconds equals 24 seconds). These switches are cumulative. All ON TIME switches set to the "ON" position must be added together to determine the total run time.

Off Time

"OFF" time is given in hours. Therefore "1" switch represents one hour. The "512" switch represents over 21 days (512 hours divided by 24 hrs/day). These switches are cumulative. All OFF TIME switches are cumulative.

The example above shows the standard factory setting of 6 seconds run time and 24 hrs. off time
